INDEPENDENT AUDITORS' REPORT

Governing Board
Escalon Unified School District
Escalon, California

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Escalon Unified School District (the District) as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *2017-18 Guide for Annual Audits of K-12 Local Education Agencies and State Compliance Reporting*, issued by the California Education Audit Appeals Panel as regulations. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Escalon Unified School District, as of June 30, 2018, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter – Change in Accounting Principles

As discussed in Note 1 and Note 14 to the financial statements, in 2018, the District adopted new accounting guidance, GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the required supplementary information, such as management's discussion and analysis, budgetary comparison information, the Schedule of Change in the Districts total OPEB liability and related ratios, Schedule of the District's proportionate share of the net OPEB liability – MPP Program, Schedule of the District's Proportionate Share of the Net Pension Liability, and Schedule of District's Contributions for Pensions be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Escalon Unified School District's basic financial statements. The Supplementary Information section, as listed in the Table of Contents, is presented for purposes of additional analysis and as required by Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) and the *2017-18 Guide for Annual Audits of K-12 Local Education Agencies and State Compliance Reporting*, published by the Education Audit Appeals Panel, and are not a required part of the basic financial statements.

The Supplementary Information section is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 5, 2018, on our consideration of the Escalon Unified School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Escalon Unified School District's internal control over financial reporting and compliance.

Escalon Unified School District

This section of Escalon Unified School District's (the "District") annual financial report presents our discussion and analysis of the District's financial performance during the fiscal year that ended on June 30, 2018. Please read it in conjunction with the District's financial statements, which immediately follow this section.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Financial Statements

The financial statements presented herein include all of the activities of the Escalon Unified School District using the integrated approach as prescribed by Governmental Accounting Standards Board (GASB) Statement No. 34.

The *Government-Wide Financial Statements* present the financial picture of the District from the economic resources measurement focus using the accrual basis of accounting. They present governmental activities. These statements include all assets of the District as well as all liabilities (including long-term debt). Additionally, certain eliminations have occurred as prescribed by the statement in regards to interfund activity, payables and receivables.

The *Governmental Activities* are prepared using the current financial resources measurement focus and modified accrual basis of accounting.

The *Fund Financial Statements* include statements for each of the three categories of activities: governmental, proprietary and fiduciary. The District does not have any business type activities.

The *Proprietary Activities* are prepared using the economic resources measurement focus and the accrual basis of accounting.

The *Fiduciary Activities* are agency funds, which only report a balance sheet and do not have a measurement focus.

Reconciliation of the Fund Financial Statements to the Government-Wide Financial Statements is provided to explain the differences created by the integrated approach.

The Primary unit of government is the Escalon Unified School District.

REPORTING THE DISTRICT AS A WHOLE

The Statement of Net Position and the Statement of Activities

The Statement of Net Position and the Statement of Activities report information about the District as a whole and about its activities. These statements include all assets and liabilities of the District using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These two statements report the District's net assets and changes in them. Net assets are the difference between assets and liabilities, one way to measure the District's financial health, or *financial position*. Over time, *increases or decreases* in the District's net position are one indicator of whether its *financial health* is improving or deteriorating. Other factors to consider are changes in the District's property tax base and the condition of the District's facilities.

The relationship between revenues and expenses is the District's *operating results*. Since the governing board's responsibility is to provide services to our students and not to generate profit as commercial entities do, one must consider other factors when evaluating the overall health of the District. The quality of the education and the safety of our schools will likely be an important component in this evaluation.

In the *Statement of Net Position* and the *Statement of Activities*, we present the District's activities as follows:

Governmental Activities – Most of the District's services are reported in this category. This includes the education of kindergarten through grade twelve students, adult education students, the operation of child development activities, certificates of participation and the on-going effort to improve and maintain buildings and sites. Property taxes, State income taxes, user fees, interest income, Federal, State and local grants, as well as general obligation bonds, finance these activities.

REPORTING THE DISTRICT'S MOST SIGNIFICANT FUNDS

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds – not the District as a whole. Some funds are required to be established by State law and by bond covenants. However, management establishes many other funds to help it control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants, and other money that it receives from the U.S. Department of Education.

ESCALON UNIFIED SCHOOL DISTRICT

MANAGEMENT'S DISCUSSION AND ANALYSIS

JUNE 30, 2018

Governmental Funds – The District's basic services are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for spending. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the District's general government operations and the basic services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. The difference of results in the governmental fund financial statements to those in the government-wide financial statements is explained in a reconciliation following each governmental fund financial statement.

Proprietary Funds – When the District charges users for the service it provides, whether to outside customers or to other departments within the District, these services are generally reported in proprietary funds. Proprietary funds are reported in the same way that all activities are reported in the *Statement of Net Position* and the *Statement of Revenue, Expenses and Changes in Fund Net Position*. We use internal service funds (a component of proprietary funds) to report activities that provide supplies and services for the District's other programs and activities – such as the District's Self-Insurance Fund. The internal service funds are reported with governmental activities in the government-wide financial statements.

THE DISTRICT AS A TRUSTEE

Reporting the District's Fiduciary Responsibilities

The District is the trustee, or fiduciary, for funds held on behalf of others, like our funds for associated student body activities. The District's fiduciary activities are reported in the Statement of Fiduciary Net Position. We exclude these activities from the District's other financial statements because the District cannot use these assets to finance its operations. The District is responsible for ensuring that the assets reported in these funds are used for their intended purposes.

FINANCIAL HIGHLIGHTS

THE DISTRICT AS A WHOLE

Net Position

The District's net position was \$0.5 million and \$1.5 million for the fiscal years ended June 30, 2018 and 2017, respectively. Of this amount, (\$16.8 million) and (\$15.8 million) was unrestricted for the fiscal years ended June 30, 2018 and 2017, respectively. Restricted net position is reported separately to show legal constraints from debt covenants and enabling legislation that limit the School Board's ability to use those net assets for day-to-day operations. Our analysis below focuses on the net position (Table 1); and the change in net position (Table 2); of the District's governmental activities. The increase in long-term obligations and deferred outflows of resources is directly related to the implementation of GASB statements No. 75 related to the recording of total OPEB liability.

MANAGEMENT'S DISCUSSION AND ANALYSIS JUNE 30, 2018

The (\$16.8 million) as of June 30, 2018 in unrestricted net position of governmental activities represent the accumulated results of all past years' operations. The June 30, 2018, unrestricted net position decreased by one million as compared to June 30, 2017.

Changes in Net Position

The results of this year's operations for the District as a whole are reported in the Statement of Activities on page 18. Table 2 takes the information from the Statement, rounds off the numbers, and rearranges them slightly so you can see our total revenues and expenses for the year.

Governmental Activities

As reported in the *Statement of Activities* on page 18, the cost of all of our governmental activities for the years ended June 30, 2018 and 2017 were \$33.5 million and \$31.4 million, respectively. However, the amount that our taxpayers ultimately financed for these activities through local taxes was only \$7.7 and \$7.6 million, respectively, because the cost was paid by those who benefited from the programs (\$0.3 and \$0.4 million, respectively) or by other governments and organizations who subsidized certain programs with grants and contributions (\$4.0 and \$3.9 million respectively). We paid for the remaining "public benefit" portions of our governmental activities with \$19.5 and \$19.0 million, respectively, in other Federal and State sources, and with other revenues, like interest and general entitlements of \$1.0 and \$0.6 million, respectively.

In Table 3, we have presented the net cost (total cost less revenues generated by the activities) of each of the District's five largest functions – instruction and instruction related, student support services, administration, maintenance and operations, and other. As discussed above, net cost shows the financial burden that was placed on the District's taxpayers by each of these functions. Providing this information allows our citizens to consider the cost of each function in comparison to the benefits they believe are provided by that function.

Table 3

Program revenues financed 13 percent of the total cost of providing the service listed above, while the remaining 87 percent was financed by the general revenue of the District.

THE DISTRICT'S FUNDS

As the District completed the years ended June 30, 2018 and 2017, our governmental funds reported a combined fund balance of \$18,998,115 and \$23,889,272, respectively. This is a decrease of \$4,891,157 from the prior year.

Total	\$ 23,889,272	\$ 37,481,354	\$ 42,372,511	\$ 18,998,115

The primary reasons for these changes are:

- The General Fund is our primary operating fund. The Fund balance increased by \$15,712. This increase is primarily due to one-time money allocated in 2017-18 that was not totally expended, increasing the ending fund balance and an increase in Special Reserve for Other than Capital Outlay.
- All other fund changes were due to specific reasons. Due to growth, the Charter School is continuing to build reserves for future facility needs. The biggest decrease was the Qualified Zone Academy Bond (QZAB) funds in the amount of \$5,401,608 expended for the district wide solar project. The QZAB was a decrease to Fund 40. The high school modernization was completed and the Dent Elementary modernization planning has begun. These projects along with the sale of the final Series B bonds sold in December reflect the changes in Building Fund of an overall decrease of \$202,141.

General Fund Budgetary Highlights

Over the course of the year, the District revises its budget as it attempts to deal with unexpected changes in revenues and expenditures. The final amendment to the budget was adopted on September 18, 2018. (A schedule showing the District's original and final budget amounts compared with amounts actually paid and received is provided in our annual report on page 70.)

The District's original projected General Fund Revenues were \$25.6 million; however actual revenues were \$26.8 million. The additional \$1.2 million is comprised of several adjustments including increased LCFF, Federal Deferred Revenue, a one-time mandated cost payment, and an increase of other local revenue including MAA, SELPA apportionment, interest and donations.

Original budget for expenditures were \$25.6 million; however actual expenditures were \$26.8 million. A salary increase to all staff, one time expenditures for one-time revenues received, Educator Effectiveness expenditures, transfers out to other funds makes up for most of the difference.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

At June 30, 2018 and 2017, the District had \$43.0 million and \$34.1 million, respectively, in a broad range of capital assets net of accumulated depreciation, including land, buildings, furniture and equipment. For 2018 this represents a net increase (including additions, deductions and depreciation) of \$8.9 million, from the prior year.

We present more detailed information regarding our capital assets in Note 4 of the financial statements.

Long-Term Obligations

At June 30, 2018 and 2017, the District had \$26.5 million and \$22.8 million, respectively, in bonds outstanding. The bonds were issued for construction projects. Long-term obligations consisted of:

SIGNIFICANT ACCOMPLISHMENTS OF FISCAL YEAR 2017-2018 ARE NOTED BELOW:

- Due to Measure B, Series B bonds; phase II of Escalon High School modernization was completed in late 2017 and the planning for modernization of Dent Elementary began.
- Supplemental funding provided additional services to the District's students.
- The District's primary income source for the general fund is the Local Control Funding Formula. In conjunction with the District Local Control Accountability Plan our budget reflects the District's goals and learning objectives. The LCFF accounts for 83% of our budget, while the Federal, State and Local account for 5%, 8% and 4% respectively in the general fund
- Solar was installed and implemented District wide due to the QZAB zero percent loan the district was able to secure.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET AND RATES

The District used the following assumptions in constructing the 2018/19 fiscal year budget. The information provided below is current as of July 1, 2018.

Local Control Fund Formula (LCFF)

The Local Control Funding Formula (LCFF) is the new finance system for K-12 education. The LCFF provides base, supplemental, and concentration grants in place of most previously existing funding sources, including revenue limits and most state categorical programs. As part of the LCFF, the district will be required to develop, adopt, and annually update three-year Local Control and Accountability Plan (LCAP) using a template adopted by the California State Board of Education.

The key assumptions in our revenue forecast at budget were:

- LCFF was forecasted using 2017-2018 P2 with an estimated decrease of 25 ADA. LCFF is calculated based on grade level. Supplemental funding is based on the percentage of our neediest students.
- Interest remained level in all funds.
- One time payments, federal carryover, Prop 39 CA Clean Air, donations and miscellaneous revenues were removed.

The key assumptions in our expenditure forecast at budget were:

- All expenditures were based on prior year spending with adding additional costs for insurance and fuel. Reduced expenditures for utilities with expectations of savings due to solar.
- Increase to PERS and STRS due to regulations and scheduled increases.
- Added expenditure for SERP cost.
- Educator Effectiveness, Prop 39 CA Clean Air, and one time expenditures were removed.
- Added some supplemental positions and expenditures to meet our new supplemental spending requirements.

RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES TO THE STATEMENT OF ACTIVITIES FOR THE YEAR ENDED JUNE 30, 2018

Total Net Change in Fund Balances - Governmental Funds **\$ (4,891,157)**

Amounts Reported for Governmental Activities in the Statement of Activities are Different Because:

Capital outlays to purchase or build capital assets are reported in governmental funds as expenditures; however, for governmental activities, those costs are shown in the statement of net position and allocated over their estimated useful lives as annual depreciation expenses in the statement of activities.

This is the amount by which capital outlays exceeds depreciation in the period.

Depreciation expense	\$(1,159,911)	
Capital outlays	<u>10,120,968</u>	
Net Expense Adjustment		8,961,057

Increases in the liability for other postemployment benefits (OPEB) are not recorded as expenditures in governmental funds because they are not expected to be liquidated with current financial resources. Decreases to the liability are reported as expenditures in governmental funds, however, the payments reduce the long-term liability in the statement of net position. (345,453)

In the statement of activities, certain operating expenses, such as compensated absences (vacations) are measured by the amounts earned during the year. In the governmental funds, however, expenditures for these items are measured by the amount of financial resources used (essentially, the amounts actually paid). 33,158

Bond discounts are expensed in the governmental funds in the year bonds are issued, but are recorded as a long-term liability and amortized over the term of the bonds, in the statement of net position. (1,963)

Bond premiums are revenue in the governmental funds in the year bonds are issued, but are recorded as a long-term liability and amortized over the term of the bonds, in the statement of net position. 24,766

Payment of principal on long-term liabilities is an expenditure in the governmental funds, but it reduces long-term liabilities in the statement of net position and does not affect the statement of activities. 1,050,000

Accreted interest on capital appreciation bonds is accrued as long-term debt in the government-wide financials, increasing expense. (344,350)

Proceeds from debt provided current financial resources to governmental funds. However, issuing debt increases long-term liabilities in the statement of net position. This amount is the net effect of proceeds and issuance costs.	(4,346,222)
Interest on long-term obligations is recorded as an expenditure in the funds when it is due; however, in the statement of activities, interest expense is recognized as the interest accrues, regardless of when it is due. This is the net change in interest expense.	(80,073)
An internal service fund is used by the District's management to charge the costs of the property and liability insurance program to the individual funds. The net revenue of the internal service fund is reported with governmental activities.	47,385

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Reporting Entity

The Escalon Unified School District was unified on July 1, 1967 under the laws of the State of California. The District operates under a locally elected five-member Board form of government and provides educational services to grades kindergarten through twelve as mandated by the State and/or Federal agencies. The District operates four elementary, one middle school, one high school, one continuation school and one charter school.

A reporting entity is comprised of the primary government, component units, and other organizations that are included to ensure the financial statements are not misleading. The primary government of the District consists of all funds, departments, boards, and agencies that are not legally separate from the District. For Escalon Unified School District, this includes general operations, food service, and student related activities of the District.

Component Units

Component units are legally separate organizations for which the District is financially accountable. Component units may also include organizations that are fiscally dependent on the District, in that the District approves their budget, the issuance of their debt or the levying of their taxes. In addition, component units are other legally separate organizations for which the District is not financially accountable but the nature and significance of the organization's relationship with the District is such that exclusion would cause the District's financial statements to be misleading or incomplete. The District's component units include Escalon Charter Academy. For financial reporting purposes, the component units have a financial and operational relationship which meets the reporting entity definition criteria of the Governmental Accounting Standards Board (GASB) Statement No. 14, *The Financial Reporting Entity*, and thus are included in the financial statements of the District.

Other Related Entities

Public Entity Risk Pools and Joint Powers Authorities The District is associated with three joint powers authorities. These organizations do not meet the criteria for inclusion as component units of the District. Additional information is presented in Note 13 to the financial statements. These organizations are:

San Joaquin County Schools Workers' Compensation Insurance Group

San Joaquin County Schools Property and Liability Insurance Group

San Joaquin County Schools Data Processing Group

Basis of Presentation

The accounting system is organized and operated on a fund basis. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations. The District's funds are grouped into three broad range fund categories: governmental, proprietary, and fiduciary.

ESCALON UNIFIED SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

Governmental Funds Governmental funds are those through which most governmental functions typically are financed. Governmental fund reporting focuses on the sources, uses, and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Current liabilities are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balance. The following are the District's major and non-major governmental funds.

Major Governmental Funds

General Fund The General Fund is the chief operating fund for all Districts. It is used to account for the ordinary operations of a District. All transactions except those required or permitted by law to be in another fund are accounted for in this fund.

One fund currently defined as a special revenue fund in the California State Accounting Manual (CSAM) does not meet the GASB Statement No. 54 special revenue fund definition. Specifically, Fund 17, Special Reserve Fund for Other Than Capital Outlay Projects, is not substantially composed of restricted or committed revenue sources. While this fund is authorized by statute and will remain open for internal reporting purposes, this fund functions effectively as an extension of General Fund, and accordingly has been combined with the General Fund for presentation in these audited financial statements.

Capital Project Funds The Capital Project Funds are established to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds and trust funds). The District maintains the following capital project funds:

Building Fund The Building Fund exists primarily to account separately for proceeds from the sale of bonds (Education Code Section 15146) and may not be used for any purpose other than those for which the bonds were issued.

Special Reserve Capital Outlay Fund The Special Reserve Fund is used to account for funds set up for Board designated construction projects.

Non-Major Governmental Funds

Special Revenue Funds The Special Revenue Funds are established to account for the proceeds from specific revenue sources (other than trusts or for major capital projects) that are restricted to the financing of particular activities. The District maintains the following special revenue funds:

Charter School Fund This Special Revenue Fund may be used by authorizing districts to account separately for the activities of district-operated charter schools that would otherwise be reported in the authorizing district's General Fund.

Cafeteria Fund The Cafeteria Fund is used to account separately for Federal, State and local resources to operate the food service program (Education Code Sections 38090-38093) and is used only for those expenditures authorized by the governing board as necessary for the operation of the District's food service program (Education Code Sections 38091 and 38100).

ESCALON UNIFIED SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

Deferred Maintenance Fund The Deferred Maintenance Fund is used to account separately for State apportionments and the District's contributions for deferred maintenance purposes (Education Code Sections 17582-17587) and for items of maintenance approved by the State Allocation Board.

Pupil Transportation Fund The Pupil Transportation Fund is used to account separately for State and local revenues specifically for the acquisition, rehabilitation, or replacement of equipment used to transport students (Educational Code Section 41852[b]).

Capital Project Funds The Capital Project Funds are established to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds and trust funds). The District maintains the following capital project fund:

Capital Facilities Fund The Capital Facilities Fund is used to account for resources received from developer impact fees assessed under provisions of the California Environmental Quality Act (CEQA).

Debt Service Funds The Debt Service Funds are established to account for the accumulation of resources for and the payment of principal and interest on general long-term debt.

Bond Interest and Redemption Fund The Bond Interest and Redemption Fund is used for the payment of bonds issued for a District (Education Code Sections 15125-15262).

Proprietary Funds Proprietary fund reporting focuses on the determination of operating income, changes in net assets, financial position, and cash flows. The District applies all GASB pronouncements, as well as the Financial Accounting Standards Board pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements. Proprietary funds are classified as enterprise or internal service. The District has the following proprietary fund:

Internal Service Fund Internal service funds may be used to account for any activity for which goods or services are provided to other funds of the District in return for a fee to cover the cost of operations. The District operates a property and liability self-insurance fund that is accounted for as an internal service fund.

Fiduciary Funds Fiduciary funds are used to account for assets held in trustee or agent capacity for others that cannot be used to support the District's own programs. The fiduciary fund category is split into four classifications: pension trust funds, investment trust funds, private-purpose trust funds, and agency funds. The key distinction between trust and agency is that trust funds are subject to a trust agreement that affects the degree of management involvement and the length of time that the resources are held.

Agency Fund Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of result of operations. The District's agency fund accounts for student body activities (ASB).

ESCALON UNIFIED SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

Basis of Accounting – Measurement Focus

Government-Wide Financial Statements The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the District and its component units.

The government-wide statements are prepared using the economic resources measurement focus. This is the same approach used in the preparation of the fiduciary fund financial statements but differs from the manner in which governmental fund financial statements are prepared. Governmental fund financial statements, therefore, include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for the governmental funds.

The government-wide statement of activities presents a comparison between direct expenses and program revenues for each function or program of the District's governmental activities. Direct expenses are those that are specifically associated with a service, program or department and are therefore clearly identifiable to a particular function. The District does not allocate indirect expenses to functions in the statement of activities. Program revenues include charges paid by the recipients of goods or services offered by a program, as well as grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues which are not classified as program revenues are presented as general revenues of the District, with certain exceptions. The comparison of direct expenses with program revenues identified the extent to which each governmental function is self-financing or draws from the general revenues of the District.

Net position should be reported as restricted when constraints placed on net assets use are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or imposed by law through constitutional provisions or enabling legislation. The net position restricted for other activities result from special revenue funds and the restrictions on their net assets use.

Fund Financial Statements Fund financial statements report detailed information about the District. The focus of governmental and proprietary fund financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate column. Non-major funds are aggregated and presented in a single column. The internal service fund is presented in a single column on the face of the proprietary fund statements.

Governmental Funds All governmental funds are accounted for using the flow of current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. The statement of revenues, expenditures, and changes in fund balance reports on the sources (revenues and other finances sources) and uses (expenditures and other financing uses) or current financial resources. This approach differs from the manner in which the governmental activities of the government-wide financial statements are prepared. Governmental fund financial statements, therefore, include reconciliations with brief explanations to better identify the relationship between the government-wide financial statements, prepared using the economic resources measurement focus and the accrual basis of accounting, and the governmental fund financial statements, prepared using the flow of current financial resources measurement focus and the modified accrual basis of accounting.

Proprietary Funds Proprietary funds are accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. All assets and all liabilities associated with the operation of this fund are included in the statement of net assets. The statement of changes in fund net assets presents increases (revenues) and decreases (expenses) in net total assets. The statement of cash flows provides information about how the District finances and meets the cash flow needs of its proprietary fund.

Fiduciary Funds Fiduciary funds are accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. Fiduciary funds are excluded from the government-wide financial statements because they do not represent resources of the District.

Revenues – Exchange and Non-Exchange Transactions Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on the accrual basis when the exchange takes place. On a modified accrual basis, revenue is recorded in the fiscal year in which the resources are measurable and become available. Available means that the resources will be collected within the current fiscal year or are expected to be collected soon enough thereafter, to be used to pay liabilities of the current fiscal year. Generally, available is defined as collectible within 90 days. However, to achieve comparability of reporting among California districts and so as not to distort normal revenue patterns, with specific respect to reimbursement grants and corrections to State-aid apportionments, the California Department of Education has defined available for districts as collectible within one year. The following revenue sources are considered to be both measurable and available at fiscal year-end: State apportionments, interest, certain gains, and other local sources.

Non-exchange transactions, in which the District receives value without directly giving equal value in return, include property taxes, certain grants, entitlements, and donations. Revenue from property taxes is recognized in the fiscal year in which the taxes are received. Revenue from certain grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied. Eligibility requirements include time and purpose restrictions. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized.

Unearned Revenue Unearned revenue arises when potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period or when resources are received by the District prior to the incurrence of qualifying expenditures. In subsequent periods, when both revenue recognition criteria are met, or when the District has legal claim to the resources, the liability for unearned revenue is removed from the balance sheet and revenue is recognized.

Certain grants received before the eligibility requirements are met are recorded as unearned revenue. On the governmental fund financial statements, receivables that will not be collected within the available period are also recorded as unearned revenue.

Expenses/Expenditures On the accrual basis of accounting, expenses are recognized at the time they are incurred. The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Principal and interest on long-term obligations, which has not matured, are recognized when paid in the governmental funds. Allocations of costs, such as depreciation and amortization, are not recognized in the governmental funds.

Cash and Cash Equivalents

The District's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. Cash equivalents also include cash with county treasury balances for purposes of the statement of cash flows.

Investments

Investments held at June 30, 2018, with original maturities greater than one year are stated at fair value. Fair value is estimated based on quoted market prices at year-end. All investments not required to be reported at fair value are stated at cost or amortized cost. Fair values of investments in county investment pool are determined by the program sponsor.

Prepaid Expenditures

Prepaid expenditures (expenses) represent amounts paid in advance of receiving goods or services. The District has the option of reporting an expenditure in governmental funds for prepaid items either when purchased or during the benefit period. The District has chosen to report the expenditures when incurred.

Stores Inventory

Inventories are recorded using the consumption method, in that inventory acquisitions are initially recorded in inventory (asset) accounts, and are charged as expenditures when used. Reported inventories are equally offset by nonspendable fund balance which indicates that these amounts are not "available for appropriation and expenditure" even though they are a component of net current assets. The District's cafeteria inventory valuation is First-in-First-out (FIFO).

Capital Assets and Depreciation

The accounting and reporting treatment applied to the capital assets associated with a fund are determined by its measurement focus. Capital assets are long-lived assets of the District. The District maintains a capitalization threshold of \$5,000. The District does not possess any infrastructure. Improvements are capitalized; the cost of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not capitalized, but are expensed as incurred.

When purchased, such assets are recorded as expenditures in the governmental funds and capitalized in the government-wide statement of net assets. The valuation basis for capital assets is historical cost, or where historical cost is not available, estimated historical cost based on replacement cost. Donated capital assets are capitalized at estimated fair market value on the date donated.

Capital assets in the proprietary funds are capitalized in the fund in which they are utilized. The valuation basis for proprietary fund capital assets is the same as those used for the capital assets of governmental funds.

Depreciation is computed using the straight-line method. Estimated useful lives of the various classes of depreciable capital assets are as follows: buildings, 20 to 50 years; improvements/infrastructure, 5 to 50 years; equipment, 2 to 15 years.

NOTES TO FINANCIAL STATEMENTS

Deferred Outflows/Inflows of Resources

In addition to assets, the Statement of Net Position also reports deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to a future period and so will not be recognized as an expense or expenditure until then. The District reports deferred outflows of resources for deferred charges on refunding of debt, for pension related items, and for OPEB related items.

In addition to liabilities, the Statement of Net Position reports a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to a future period and so will not be recognized as revenue until then. The District reports deferred inflows of resources for pension related items.

Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the California State Teachers Retirement System (CalSTRS) and the California Public Employees' Retirement System (CalPERS) plan for Schools (Plans) and additions to/deductions from the Plans' fiduciary net position have been determined on the same basis as they are reported by CalSTRS and CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Member contributions are recognized in the period in which they are earned. Investments are reported at fair value.

Interfund Balances (Due to/from)

In the financial statements, receivables and payables resulting from short-term interfund loans are classified as "interfund receivables/payables". These amounts are eliminated in the governmental and business-type activities columns of the statement of net assets, except for the net residual amounts due between governmental and business-type activities, which are presented as internal balances.

Compensated Absences

Accumulated unpaid vacation benefits are accrued as a liability as the benefits are earned. The entire compensated absence liability is reported on the government-wide statement of net assets. For governmental funds, the current portion of unpaid compensated absences is recognized upon the occurrence of relevant events such as employee resignations and retirements that occur prior to year-end that have not yet been paid with expendable available financial resources. These amounts are reported in the fund from which the employees who have accumulated leave are paid.

Sick leave is accumulated without limit for each employee at the rate of one day for each month worked. Leave with pay is provided when employees are absent for health reasons; however, the employees do not gain a vested right to accumulated sick leave. Employees are never paid for any sick leave balance at termination of employment or any other time. Therefore, the value of accumulated sick leave is not recognized as a liability in the District's financial statements. However, credit for unused sick leave is applicable to all classified school members who retire after January 1, 1999. At retirement, each member will receive .004 year of service credit for each day of unused sick leave.

Accrued Liabilities and Long-Term Obligations

All payables, accrued liabilities, and long-term obligations are reported in the government-wide and proprietary fund financial statements. In general, governmental fund payables and accrued liabilities that, once incurred, are paid in a timely manner and in full from current financial resources are reported as obligations of the governmental funds.

However, claims and judgments, compensated absences, special termination benefits, and contractually required pension contributions that will be paid from government funds are reported as a liability in the governmental fund financial statements only to the extent that they are due for repayment during the current year. Bonds, capital leases, and other long-term obligations are recognized as liabilities in the governmental fund financial statements when due.

Premiums and Discounts

In the government-wide financial statements and in the proprietary fund type financial statements, long-term obligations are reported as liabilities in the applicable governmental activities or proprietary fund statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the straight-line method.

Postemployment Benefits Other Than Pensions (OPEB)

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the CalSTRS Medicare Premium Payment (MPP) Program and additions to/deductions from MPP's fiduciary net position have been determined on the same basis as they are reported by MPP. For this purpose, MPP recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

Fund Balance Reporting

The District reports fund balance within one of the following categories:

Nonspendable such as fund balance associated with inventories, prepaids, long-term loans and notes receivable, and property held for resale (unless the proceeds are restricted, committed, or assigned),

Restricted fund balance category includes amounts that can be spent only for the specific purposes stipulated by constitution, external resources providers, or through enabling legislation,

Committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the School District Board of Directors (the district's highest level of decision-making authority),

Assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as restricted or committed, and

ESCALON UNIFIED SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

Unassigned fund balance is the residual classification for the government's general fund and includes all spendable amounts not contained in the other classifications.

Committed Fund Balance Policy For funds that are determined to fall within the "Committed Fund Balance" classification, the Governing Board, as the District's highest level of decision-making authority, may commit fund balance for specific purposes pursuant to constraints imposed by formal actions taken, such as a majority vote or resolution. These committed amounts cannot be used for any other purpose unless the Governing Board removes or changes the specific use through the same type of formal action taken to establish the commitment. Governing Board action to commit fund balance needs to occur within the fiscal reporting period, no later than June 30th; however, the amount can be determined with the release of the financial statements.

Assigned Fund Balance Policy Amounts that are constrained by the District's intent to be used for specific purposes, but are neither restricted nor committed, should be reported as assigned fund balance. The District delegates the authority to assign amounts to be used for specific purposes to the Chief Business Official for the purpose of reporting these amounts in the financial statements.

Minimum Fund Balance Policy The purpose of the District's fund balance policy is to maintain a prudent level of financial resources to protect against reducing service levels because of temporary revenue shortfalls or unpredicted one-time expenditures.

The District has adopted a policy to achieve and maintain unrestricted fund balance in the General Fund of three percent of total General Fund expenditures, other uses and transfers out at the close of each fiscal year, consistent with the recommended level promulgated by the State of California.

Order of Fund Balance Spending Policy For which amounts in any of the unrestricted fund balance classifications could be used, the District's policy is to apply expenditures in the following order: committed, assigned, and then unassigned.

First, non-spendable fund balances are determined. Then restricted fund balances for specific purposes are determined (not including non-spendable amounts). Then any remaining fund balances amounts for the non-general funds are classified as restricted fund balance.

It is possible for the non-general funds to have negative unassigned fund balance when non-spendable amounts plus the restricted fund balances for specific purposes amounts exceed the positive fund balances for the non-general fund.

Net Position

Net position represents the difference between assets and liabilities. Net position invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation, is reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The District first applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available.

NOTES TO FINANCIAL STATEMENTS

Operating Revenues and Expenses

Operating revenues are those revenues that are generated directly from the primary activity of the proprietary funds. For the District, these revenues include other local sources. Operating expenses are necessary costs incurred to provide the good or service that are the primary activity of the fund. All revenues and expenses not meeting this definition such as interest revenue are reported as non-operating revenues and expenses.

Interfund Activity

Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flows of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources/uses in governmental funds and after non-operating revenues/expenses in proprietary funds. Repayments from funds responsible for particular expenditures/expenses to the funds that initially paid for them are not presented in the financial statements.

Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

Budgetary Data

The budgetary process is prescribed by provisions of the California Education Code and requires the governing board to hold a public hearing and adopt an operating budget no later than July 1st of each year. The District governing board satisfied these requirements. The adopted budget is subject to amendment throughout the year to give consideration to unanticipated revenue and expenditures primarily resulting from events unknown at the time of budget adoption with the legal restriction that expenditures cannot exceed appropriations by major object account.

The amounts reported as the original budgeted amounts in the budgetary statements reflect the amounts when the original appropriations were adopted. The amounts reported as the final budgeted amounts in the budgetary statements reflect the amounts after all budget amendments have been accounted for. For purposes of the budget, on behalf payments have not been included as revenue and expenditures as required under generally accepted accounting principles.

Property Tax

Secured property taxes attach as an enforceable lien on property as of January 1. Taxes are payable in two installments on November 1 and February 1 and become delinquent on December 10 and April 10, respectively. Unsecured property taxes are payable in one installment on or before August 31. The County of San Joaquin bills and collects the taxes on behalf of the District. Local property tax revenues are recorded when received.

Change in Accounting Principles

GASB Statement No. 75 – In June 2015, the GASB issued Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pension*. The primary objective of this Statement is to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB). It also improves information provided by state and local governmental employers about financial support for OPEB that is provided by other entities. This Statement results from a comprehensive review of the effectiveness of existing standards of accounting and financial reporting for all postemployment benefits (pensions and OPEB) with regard to providing decision-useful information, supporting assessments of accountability and inter-period equity, and creating additional transparency.

This Statement replaces the requirements of Statements No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, as amended, and No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*, for OPEB. Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, establishes new accounting and financial reporting requirements for OPEB plans. This Statement is effective for financial statements for periods beginning after June 15, 2017.

The District has implemented the provisions of this Statement as of June 30, 2018.

GASB Statement No. 85 - In March 2017, the GASB issued Statement No. 85, *Omnibus 2017*. The objective of this Statement is to address practice issues that have been identified during implementation and application of certain GASB statements. This Statement addresses a variety of topics including issues related to blending component units, goodwill, fair value measurement and application, and postemployment benefits (pensions and other postemployment benefits [OPEB]). Specifically, this Statement addresses the following topics:

- Blending a component unit in circumstances in which the primary government is a business-type activity that reports in a single column for financial statement presentation;
- Reporting amounts previously reported as goodwill and "negative" goodwill;
- Classifying real estate held by insurance entities;
- Measuring certain money market investments and participating interest-earning investment contracts at amortized cost;
- Timing of the measurement of pension or OPEB liabilities and expenditures recognized in financial statements prepared using the current financial resources measurement focus;
- Recognizing on behalf payments for pensions or OPEB in employer financial statements;
- Presenting payroll-related measures in required supplementary information for purposes of reporting by OPEB plans and employers that provide OPEB;
- Classifying employer-paid member contributions for OPEB;
- Simplifying certain aspects of the alternative measurement method for OPEB;
- Accounting and financial reporting for OPEB provided through certain multiple-employer defined benefit OPEB plans.

The District has implemented the provisions of this Statement as of June 30, 2018.

GASB Statement No. 86 - In May 2017, the GASB issued Statement No. 86, *Certain Debt Extinguishment Issues*. The primary objective of this Statement is to improve consistency in accounting and financial reporting for

ESCALON UNIFIED SCHOOL DISTRICT

in-substance defeasance of debt by providing guidance for transactions in which cash and other monetary assets acquired with only existing resources - resources other than the proceeds of refunding debt - are placed in an irrevocable trust for the sole purpose of extinguishing debt. This Statement also improves accounting and financial reporting for prepaid insurance on debt that is extinguished and notes to financial statements for debt that is defeased in substance.

The District has implemented the provisions of this Statement as of June 30, 2018.

New Accounting Pronouncements

GASB Statement No. 87 – In June 2017, GASB issued Statement No. 87, *Leases*. The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities. This statement are effective for reporting periods beginning after December 15, 2019.

GASB Statement No. 88 – In April 2018, GASB issued Statement No. 88, *Certain Disclosures Related to Debt, including Direct Borrowing and Direct Placements*. The primary objective of this statement is to improve the information that is disclosed in notes to the government financial statement related to debt, including direct borrowing and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt. This statement are effective for reporting periods beginning after June 15, 2018.

GASB Statement No. 89 – In June 2017, GASB issued Statement No. 89, *Accounting for interest Cost Incurred before the End of a Construction Period*. The objectives of this statement are to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and to simplify accounting for interest cost incurred before the end of construction period. This statement is effective for reporting periods beginning after December 15, 2019.

Deposits and investments as of June 30, 2018, consist of the following:

Cash on hand and in banks	\$ 580,385
Cash in revolving accounts	16,000
Investments	18,619,341
Total Deposits and Investments	\$ 19,215,726

Policies and Practices

The District is authorized under California Government Code to make direct investments in local agency bonds, notes, or warrants within the State; U.S. Treasury instruments; registered State warrants or treasury notes; securities of the U.S. Government, or its agencies; bankers acceptances; commercial paper; certificates of deposit placed with commercial banks and/or savings and loan companies; repurchase or reverse repurchase agreements; medium term corporate notes; shares of beneficial interest issued by diversified management companies, certificates of participation, obligations with first priority security; and collateralized mortgage obligations.

Investment in County Treasury – The District is considered to be an involuntary participant in an external investment pool as the District is required to deposit all receipts and collections of monies with their County Treasurer (Education Code Section 41001). The fair value of the District's investment in the pool is reported in the accounting financial statements at amounts based upon the District's pro-rata share of the fair value provided by the County Treasurer for the entire portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by the County Treasurer, which is recorded on the amortized cost basis.

Authorized Under Debt Agreements

Investments of debt proceeds held by bond trustees are governed by provisions of the debt agreements, rather than the general provisions of the California Government Code. These provisions allow for the acquisition of investment agreements with maturities of up to 30 years.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. The District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The District manages its exposure to interest rate risk by primarily investing in the San Joaquin County Investment Pool.

Fair Value Measurements

The District categorizes the fair value measurements of its investments based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value. The following provides a summary of the hierarchy used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets that the District has the ability to access at the measurement date. Level 1 assets may include debt and equity securities that are traded in an active exchange market and that are highly liquid and are actively traded in over-the-counter markets.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, or other inputs that are observable, such as interest rates and curves observable at commonly quoted intervals, implied volatilities, and credit spreads. For financial reporting purposes, if an asset has a specified term, a Level 2 input is required to be observable for substantially the full term of the asset.

Level 3 - Unobservable inputs should be developed using the best information available under the circumstances, which might include the District's own data. The District should adjust that data if reasonably available information indicates that other market participants would use different data or certain circumstances specific to the District are not available to other market participants.

Uncategorized - Investments in the San Joaquin County Treasury Investment Pool are not measured using the input levels above because the District's transactions are based on a stable net asset value per share. All contributions and redemptions are transacted at \$1.00 net asset value per share.

Weighted Average Maturity

The District monitors the interest rate risk inherent in its portfolio by measuring the weighted average maturity of its portfolio. Information about the weighted average maturity of the District's portfolio is present in the following schedule:

<u>Investment Type</u>	<u>Fair Value</u>	<u>Days to Maturity</u>
San Joaquin County Investment Pool	\$ 18,407,081	482 days

Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the minimum rating required by the California Government Code, the District's investment policy, or debt agreements, and the actual rating as of the year-end for each investment type.

Custodial Credit Risk – Deposits

This is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District does not have a policy for custodial credit risk for deposits. However, the California Government Code requires that a financial institution secure deposits made by State or local government units by pledging securities in an undivided collateral pool held by a depository regulated under State law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110 percent of the total amount deposited by the public agencies. California law also allows financial institutions to secure public deposits by pledging first trust deed mortgage notes having a value of 150 percent of the secured public deposits and letters of credit issued by the Federal Home Loan Bank of San Francisco having a value of 105 percent of the secured deposits. As of June 30, 2018, the District's bank balance was \$758,848 with a carrying amount of \$749,700.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At June 30, 2018, the District reported a liability of \$5,022,025 for its total OPEB liability. The net OPEB liability was measured as of June 30, 2018, and the total OPEB liability used to calculate the Net OPEB liability was determined by an actuarial valuation as of June 30, 2018. Standard actuarial procedures were used to project/discount from valuation to measurement dates.

For the year ending June 30, 2018, the District recognized OPEB expense of \$630,968. Certain types of TOL changes are subject to deferral, as are investment gains/losses. To qualify for deferral, gains and losses must be based on GASB 74/75 compliant valuations. Since the District's prior valuation was performed in accordance with GASB 43/45, it is not possible to calculate compliant gains and losses. Therefore, valuation-based deferred items will not begin until the next valuation.

Medicare Premium Payment (MPP) Program

Plan Description

The Medicare Premium Payment (MPP) Program is administered by the California State Teachers' Retirement System (CalSTRS). The MPP Program is a cost-sharing multiple-employer other postemployment benefit plan (OPEB) established pursuant to Chapter 1032, Statutes 2000 (SB 1435). CalSTRS administers the MPP Program through the Teachers' Health Benefits Fund (THBF).

A full description of the MPP Program regarding benefit provisions, assumptions (for funding, but not accounting purposes), and membership information is listed in the June 30, 2017 annual actuarial valuation report, Medicare Premium Payment Program Actuarial Valuation. This report and CalSTRS audited financial information are publically available reports that can be found on the CalSTRS website under Publications at: <http://www.calstrs.com/member-publications>.

Benefits Provided

The MPP Program pays Medicare Part A premiums and Medicare Parts A and B late enrollment surcharges for eligible members of the State Teachers Retirement Plan (STRP) Defined Benefit (DB) Program who were retired or began receiving a disability allowance prior to July 1, 2012 and were not eligible for premium free Medicare Part A. The payments are made directly to the Centers for Medicare and Medicaid Services (CMS) on a monthly basis.

The MPP Program is closed to new entrants as members who retire after July 1, 2012, are not eligible for coverage under the MPP Program.

Contributions

The MPP Program is funded on a pay-as-you go basis from a portion of monthly District contributions. In accordance with California *Education Code* Section 25930, contributions that would otherwise be credited to the DB Program each month are instead credited to the MPP Program to fund monthly program and administrative costs. Total redirections to the MPP Program are monitored to ensure that total incurred costs do not exceed the amount initially identified as the cost of the program.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to the OPEB

At June 30, 2018, the District reported a liability of \$149,568 for its proportionate share of the net OPEB liability for the MPP Program. The net OPEB liability was measured as of June 30, 2017, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of that date. The District's proportion of the net OPEB liability was based on a projection of the District's long-term share of contributions to the OPEB Plan relative to the projected contributions of all participating school districts, actuarially determined. The District's proportionate share for the measurement period June 30, 2018 and June 30, 2017, respectively, was 0.038 percent and 0.036 percent, resulting in a net increase in the proportionate share of 0.006 percent. For the year ended June 30, 2018, the District recognized OPEB expense of (\$4,521).

Actuarial Methods and Assumptions

The total OPEB liability for the MPP Program as of June 30, 2017, was determined based on a financial reporting actuarial valuation that used the June 30, 2016 assumptions presented in the table below. The June 30, 2018 total OPEB liability was determined by applying update procedures to the financial reporting actuarial valuation as of June 30, 2017, and rolling forward the total OPEB liability to June 30, 2018, using the assumptions listed in the following table:

Measurement Date	June, 30, 2018	June 30, 2017
Valuation Date	June 30, 2017	June 30, 2016
Experience Study	July 1, 2010 through June 30, 2015	July 1, 2010 through June 30, 2015
Actuarial Cost Method	Entry age normal	Entry age normal
Investment Rate of Return	3.87%	3.58%
Medicare Part A Premium Cost Trend Rate	3.70%	3.70%
Medicare Part B Premium Cost Trend Rate	4.10%	4.10%

For the valuation as of June 30, 2017, CalSTRS used custom mortality tables based on RP2000 Series tables issued by the Society of Actuaries, adjusted to fit CalSTRS specific experience through June 30, 2015. For the valuation as of June 30, 2018, CalSTRS changed the mortality assumptions based on the July 1, 2010 through June 30, 2015, experience study adopted by the board in February 2017. CalSTRS now uses a generational mortality assumption, which involves the use of a base mortality table and projection scales to reflect expected annual reductions in mortality rates at each age, resulting in increases in life expectancies each year into the future. The base mortality tables are CalSTRS custom tables derived to best fit the patterns of mortality among the members. The projection scale was set equal to 110 percent of the ultimate improvement factor from the Mortality Improvement Scale (MP-2016) table, issued by the Society of Actuaries.

Assumptions were made about future participation (enrollment) into the MPP Program because CalSTRS is unable to determine which members not currently participating meet all eligibility criteria for enrollment in the future. Assumed enrollment rates were derived based on past experience and are stratified by age with the probability of enrollment diminishing as the members' age increases. This estimated enrollment rate was then applied to the population of members who may meet criteria necessary for eligibility and are not currently enrolled in the MPP Program. Based on this, the estimated number of future enrollments used in the financial reporting valuation was 459 or an average of 0.27 percent of the potentially eligible population (171,593).

The MPP Program is funded on a pay-as-you-go basis with contributions generally being made at the same time

and in the same amount as benefit payments and expenses coming due. Any funds within the MPP Program as of June 30, 2018 and 2017, were to manage differences between estimated and actual amounts to be paid and were invested in the Surplus Money Investment Fund, which is a pooled investment program administered by the state treasurer.

Discount Rate

The discount rate used to measure the total OPEB liability as of June 30, 2018 and 2017 was 3.87 percent and 3.58 percent, respectively. The MPP Program is funded on a pay-as-you-go basis as described in Note 1, and under the pay-as-you-go method, the OPEB Plan's fiduciary net position was not projected to be sufficient to make projected future benefit payments. Therefore, a discount rate of 3.87 percent and 3.58 percent, which is the Bond Buyer 20-Bond GO Index from Bondbuyer.com as of June 30, 2018 and 2017, respectively, was applied to all periods of projected benefit payments to measure the total OPEB liability.

Sensitivity of the District's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate

The following presents the District's proportionate share of the net OPEB liability calculated using the current discount rate, as well as what the net pension liability would be if it were calculated using a discount rate that is one percent lower or higher than the current rate:

NOTE 10 – RISK MANAGEMENT

Property and Liability

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. During the fiscal year ending June 30, 2018, the

District contracted for property and liability insurance coverage. Settled claims have not exceeded this commercial coverage in any of the past three years. There has not been a significant reduction in coverage from the prior year.

Workers' Compensation

For the fiscal year 2017, the District participated in the San Joaquin County Schools Workers' Compensation Insurance Group, an insurance purchasing pool. The intent of the San Joaquin County Schools Workers' Compensation Insurance Group is to achieve the benefit of a reduced premium for the District by virtue of its grouping and representation with other participants in the San Joaquin County Schools Workers' Compensation Insurance Group. The workers' compensation experience of the participating districts is calculated as one experience and a common premium rate is applied to all districts in the San Joaquin County Schools Workers' Compensation Insurance Group. Each participant pays its workers' compensation premium based on its individual rate. Total savings are then calculated and each participant's individual performance is compared to the overall savings percentage. A participant will then either receive money from or be required to contribute to the "equity-pooling fund". This "equity-pooling" arrangement insures that each participant shares equally in the overall performance of the San Joaquin County Schools Workers' Compensation Insurance Group. Participation in the San Joaquin County Schools Workers' Compensation Insurance Group is limited to districts that can meet the San Joaquin County Schools Workers' Compensation Insurance Group selection criteria.

Employee Medical Benefits

The District has contracted with the Self Insured Schools of California to provide employee medical and surgical benefits for all employees. The entity is a shared risk pool comprised of school districts throughout the state. Rates are set through an annual calculation process. The District pays a monthly contribution to the entity, which is placed in a common fund from which claim payments are made for all participating Districts. Claims are paid for all participants regardless of claims flow. The Board of Directors has a right to return monies to a district subsequent to the settlement of all expenses and claims if a district withdraws from the pool.

Qualified employees are covered under multiple-employer defined benefit pension plans maintained by agencies of the State of California. Academic employees are members of the California State Teachers’ Retirement System (CalSTRS) and classified employees are members of the California Public Employees’ Retirement System (CalPERS)

The District implemented GASB Statement No. 68 and No. 71 for the fiscal year ended June 30, 2018. As a result, the District reported its proportionate share of the net pension liabilities, pension expense and deferred inflow of resources for each of the above plans and a deferred outflow of resources for each of the above plans as follows:

California State Teachers' Retirement System (CalSTRS)

Plan Description

The District contributes to the State Teachers Retirement Plan (STRP) administered by the California State Teachers' Retirement System (CalSTRS). STRP is a cost-sharing multiple-employer public employee retirement system defined benefit pension plan. Benefit provisions are established by State statutes, as legislatively amended, within the State Teachers' Retirement Law.

A full description of the pension plan regarding benefit provisions, assumptions (for funding, but not accounting purposes), and membership information is listed in the June 30, 2015, annual actuarial valuation report, Defined Benefit Program Actuarial Valuation. This report and CalSTRS audited financial information are publically available reports that can be found on the CalSTRS website under Publications at: <http://www.calstrs.com/member-publications>.

Benefits Provided

The STRP provides retirement, disability and survivor benefits to beneficiaries. Benefits are based on members' final compensation, age and years of service credit. Members hired on or before December 31, 2012, with five years of credited service are eligible for the normal retirement benefit at age 60. Members hired on or after January 1, 2013, with five years of credited service are eligible for the normal retirement benefit at age 62. The normal retirement benefit is equal to 2.0 percent of final compensation for each year of credited service.

The STRP is comprised of four programs: Defined Benefit Program, Defined Benefit Supplement Program, Cash Balance Benefit Program and Replacement Benefits Program. The STRP holds assets for the exclusive purpose of providing benefits to members and beneficiaries of these programs. CalSTRS also uses plan assets to defray reasonable expenses of administering the STRP. Although CalSTRS is the administrator of the STRP, the state is

the sponsor of the STRP and obligor of the trust. In addition, the state is both an employer and nonemployer contributing entity to the STRP.

The District contributes exclusively to the STRP Defined Benefit Program, thus disclosures are not included for the other plans.

The STRP provisions and benefits in effect at June 30, 2018, are summarized as follows:

	STRP Defined Benefit Program	
	On or before December 31, 2012	On or after January 1, 2013
Hire date		
Benefit formula	2% at 60	2% at 62

Benefit payments	Monthly for life	Monthly for life
Retirement age	60	62
Monthly benefits as a percentage of eligible compensation	2.0% - 2.4%	2.0% - 2.4%
Required employee contribution rate	10.25%	9.205%
Required employer contribution rate	14.43%	14.43%
Required state contribution rate	9.328%	9.328%

Contributions

Required member, District and State of California contributions rates are set by the California Legislature and Governor and detailed in Teachers' Retirement Law. The contributions rates are expressed as a level percentage of payroll using the entry age normal actuarial method. In accordance with AB 1469, employer contributions into the CalSTRS will be increasing to a total of 19.1 percent of applicable member earnings phased over a seven year period. The contribution rates for each plan for the year ended June 30, 2018, are presented above and the District's total contributions were \$1,850,446.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2018, the District reported a liability for its proportionate share of the net pension liability that reflected a reduction for State pension support provided to the District. The amount recognized by the District as its proportionate share of the net pension liability, the related state support and the total portion of the net pension liability that was associated with the District were as follows:

Total net pension liability, including State share:	
District's proportionate share of net pension liability	\$ 21,106,681
State's proportionate share of the net pension liability associated with the District	12,486,534
	<u>\$ 33,593,215</u>

The net pension liability was measured as of June 30, 2017. The District's proportion of the net pension liability was based on a projection of the District's long-term share of contributions to the pension plan relative to the projected contributions of all participating school districts and the State, actuarially determined. The District's

proportionate share for measurement period June 30, 2017 and June 30, 2016, respectively, was 0.0228 percent and 0.0237 percent, resulting in a net decrease in the proportionate share of 0.0009 percent.

For the year ended June 30, 2018, the District recognized pension expense of \$2,137,135. In addition, the District recognized pension expense and revenue of \$1,015,423 for support provided by the State. At June 30, 2018, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between projected and actual earnings on plan investments	\$ -	\$ 562,129
Differences between expected and actual experiences	-	303,089
Changes in assumption	3,910,161	-

Pension contributions subsequent to measurement date	1,850,446	-
Total	<u>\$ 5,899,079</u>	<u>\$ 1,719,546</u>

The deferred outflow of resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the subsequent fiscal year. The deferred inflow of resources will be amortized over a closed five-year period and will be recognized in pension expense as follows:

Year Ended June 30,	Deferred Outflows (Inflows) of Resources
2018	\$ (467,186)
2019	353,528
2020	51,808
2021	(500,279)
Total	<u>\$ (562,129)</u>

The deferred outflows/(inflows) of resources relate to the net change in proportionate share of net pension liability and the differences between expected and actual experience in the measurement of the total pension liability will be amortized over the Expected Average Remaining Service Life (EARSL) of all members that are provided benefits (active, inactive, and retirees) as of the beginning of the measurement period. The EARSL for the 2015-2016 measurement period is 7 years and will be recognized in pension expense as follows:

Actuarial Methods and Assumptions

Total pension liability for STRP was determined by applying update procedures to a financial reporting actuarial valuation as of June 30, 2016, and rolling forward the total pension liability to June 30, 2017. The financial reporting actuarial valuation as of June 30, 2016, used the following methods and assumptions, applied to all prior periods included in the measurement:

Valuation date	June 30, 2016
Measurement date	June 30, 2017
Experience study	July 1, 2010 through June 30, 2015
Actuarial cost method	Entry age normal
Discount rate	7.10%
Investment rate of return	7.10%
Consumer price inflation	2.75%
Wage growth	3.50%

CalSTRS uses a generational mortality assumption, which involves the use of a base mortality table and projection scales to reflect expected annual reductions in mortality rates at each age, resulting in increases in life expectancies each year into the future. The base mortality tables are CalSTRS custom tables derived to best fit the patterns of mortality among its members. The projection scale was set equal to 110 percent of the ultimate improvement factor from the Mortality Improvement Scale (MP-2016) table, issued by the Society of Actuaries.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. The best estimate ranges were developed using capital market assumptions from CalSTRS general investment consultant (Pension Consulting Alliance-PCA) as an input to the process. The actuarial investment rate of return assumption was adopted by the board in February 2017 in conjunction with the most recent experience study. For each future valuation, CalSTRS consulting actuary (Milliman) reviews the return assumption for reasonableness based on the most current capital market assumptions. Best estimates of 20-year geometrically-linked real rates of return and the assumed asset allocation for each major asset class for the year ended June 30, 2017, are summarized in the following table:

ESCALON UNIFIED SCHOOL DISTRICT

**NOTES TO FINANCIAL STATEMENTS

<u>Asset Class</u>	<u>Assumed Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
Global equity	47%	6.30%

Real estate	13%	5.20%
Private equity	13%	9.30%
Absolute Return	9%	2.90%
Inflation sensitive	4%	3.80%
Cash/liquidity	2%	-1.00%

Discount Rate

The discount rate used to measure the total pension liability was 7.10 percent. The projection of cash flows used to determine the discount rate assumed the contributions from plan members and employers will be made at statutory contribution rates. Projected inflows from investment earnings were calculated using the long-term assumed investment rate of return (7.10 percent) and assuming that contributions, benefit payments and administrative expense occurred midyear. Based on these assumptions, the STRP's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term assumed investment rate of return was applied to all periods of projected benefit payments to determine total pension liability.

The following presents the District's proportionate share of the net pension liability calculated using the current discount rate as well as what the net pension liability would be if it were calculated using a discount rate that is one percent lower or higher than the current rate:

<u>Discount Rate</u>	<u>Net Pension Liability</u>
1% decrease (6.10%)	\$ 30,991,309

NOTES TO FINANCIAL STATEMENTS JUNE 30, 2018

Benefits Provided

CalPERS provides service retirement and disability benefits, annual cost of living adjustments and death benefits to plan members, who must be public employees and beneficiaries. Benefits are based on years of service credit, a benefit factor and the member's final compensation. Members hired on or before December 31, 2012, with five years of total service are eligible to retire at age 50 with statutorily reduced benefits. Members hired on or after January 1, 2013, with five years of total service are eligible to retire at age 52 with statutorily reduced benefits. All members are eligible for non-duty disability benefits after five years of service. The Basic Death Benefit is paid to any member's beneficiary if the member dies while actively employed. An employee's eligible survivor may receive the 1957 Survivor Benefit if the member dies while actively employed, is at least age 50 (or 52 for members hired on or after January 1, 2013), and has at least five years of credited service. The cost of living adjustments for each plan are applied as specified by the Public Employees' Retirement Law.

The CalPERS provisions and benefits in effect at June 30, 2018, are summarized as follows:

	School Employer Pool (CalPERS)	
	On or before December 31, 2012	On or after January 1, 2013

Required employee contribution rate	7.000%	6.5%
Required employer contribution rate	15.531%	15.531%

Contributions

Section 20814(c) of the California Public Employees' Retirement Law requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. Total plan contributions are calculated through the CalPERS annual actuarial valuation process. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The District is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. The contributions rates are expressed as percentage of annual payroll. The contribution rates for each plan for the year ended June 30, 2018, are presented above and the total District contributions were \$644,643.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

As of June 30, 2018, the District reported net pension liabilities for its proportionate share of the CalPERS net pension liability totaling \$6,026,075. The net pension liability was measured as of June 30, 2018. The District's proportion of the net pension liability was based on a projection of the District's long-term share of contributions to the pension plan relative to the projected contributions of all participating school districts, actuarially determined. The District's proportionate share for measurement period June 30, 2016 and June 30, 2015, respectively, was 0.0306 percent and 0.0305 percent, resulting in a net increase in the proportionate share of 0.0001 percent.

**NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2018**

For the year ended June 30, 2018, the District recognized pension expense of \$1,445,586. At June 30, 2018, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between projected and actual earnings on plan investments	\$ 252,574	\$ -
Differences between expected and actual experience	261,575	-

Changes in proportion and differences between District contributions and proportionate share contributions	23,655	-
Pension contributions subsequent to measurement date	644,643	-
Total	<u>\$ 2,153,399</u>	<u>\$ -</u>

The deferred outflow of resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the subsequent fiscal year. The deferred inflow of resources will be amortized over a closed five-year period and will be recognized in pension expense as follows:

Year Ended June 30,	Deferred Outflows (Inflows) of Resources

ESCALON UNIFIED SCHOOL DISTRICT

NOTES TO FINANCIAL STATEMENTS JUNE 30, 2018

Actuarial Methods and Assumptions

Total pension liability for the SEP was determined by applying update procedures to a financial reporting actuarial valuation as of June 30, 2016, and rolling forward the total pension liability to June 30, 2017. The financial reporting actuarial valuation as of June 30, 2016, used the following methods and assumptions, applied to all prior periods included in the measurement:

Valuation date	June 30, 2016
Measurement date	June 30, 2017
Experience study	July 1, 1997 through June 30, 2011
Actuarial cost method	Entry age normal
Discount rate	7.15%
Investment rate of return	7.15%
Consumer price inflation	2.75%
Wage growth	Varies by entry age and service

The mortality table used was developed based on CalPERS-specific data. The table includes 20 years of mortality improvements using Society of Actuaries Scale BB.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all the funds' asset classes, expected compound returns were calculated over the short-term (first ten years) and the long-term (11+ years) using a building-block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses. The target asset allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Assumed Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
Global equity	47%	5.38%
Global fixed income	19%	2.27%
Private equity	12%	6.63%
Real estate	11%	5.21%
Inflation sensitive	6%	1.39%
Infrastructure and Forestland	3%	5.36%
Liquidity	2%	-0.90%

Discount Rate

The discount rate used to measure the total pension liability was 7.15 percent. The projection of cash flows used to determine the discount rate assumed the contributions from plan members and employers will be made at statutory contribution rates. Based on these assumptions, the School Employer Pool fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term assumed investment rate of return was applied to all periods of projected benefit payments to determine total pension liability.

Social Security

As established by Federal law, all public sector employees who are not members of their employer's existing retirement system (CalSTRS or CalPERS) must be covered by social security or an alternative plan. The District has elected to use social security. Contributions made by the District and an employee vest immediately. The District contributes 6.2% of an employee's gross earnings and employees are required to contribute an additional 6.2% of gross earnings.

On Behalf Payments

The State of California makes contributions to CalSTRS on behalf of the District. These payments consist of State General Fund contributions to CalSTRS in the amount of \$1,015,423 (9.328% of annual payroll). Under accounting principles generally accepted in the United States of America, these amounts are to be reported as revenue and expenditures. Accordingly, these amounts have been recorded in these financial statements. On behalf payments have been excluded from the calculations of available reserves.

NOTE 12 – COMMITMENTS AND CONTINGENCIES

Grants

The District received financial assistance from Federal and State agencies in the form of grants. The disbursement of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and are subject to audit by the grantor agencies. Any disallowed claims resulting from such audits could become a liability of the General Fund or other applicable funds. However, in the opinion of management, any such disallowed claims will not have a material adverse effect on the overall financial position of the District at June 30, 2018.

Litigation

The District is involved in various legal litigation arising from the normal course of business. In the opinion of management and legal counsel, the disposition of all litigation pending is not expected to have a material adverse effect on the overall financial position of the District at June 30, 2018.

ESCALON UNIFIED SCHOOL DISTRICT

NOTE TO REQUIRED SUPPLEMENTARY INFORMATION FOR THE YEAR ENDED JUNE 30, 2018

NOTE 1 – PURPOSE OF SCHEDULES

Budgetary Comparison Schedule

The District employs budget control by object codes and by individual appropriation accounts. Budgets are prepared on the modified accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America as prescribed by the Governmental Accounting Standards Board and provisions of the California *Education Code*. The governing board is required to hold a public hearing and adopt an operating budget no later than July 1 of each year. The adopted budget is subject to amendment throughout the year to give consideration to unanticipated revenue and expenditures primarily resulting from events unknown at the time of budget adoption with the legal restriction that expenditures cannot exceed appropriations by major object account.

The amounts reported as the original budgeted amounts in the budgetary statements reflect the amounts when the original appropriations were adopted. The amounts reported as the final budgeted amounts in the budgetary statements reflect the amounts after all budget amendments have been accounted for.

This schedule presents information for the original and final budgets and actual results of operations, as well as the variances from the final budget to actual results of operations.

Schedule of Changes in the District's Total OPEB Liability and Related Ratios

This schedule presents information on the District's changes in the total OPEB liability, including beginning and ending balances, and the total OPEB liability. In the future, as data becomes available, ten years of information will be presented.

Change in Benefit Terms - There were no changes in benefit terms since the previous valuation for other postemployment benefits.

Change of Assumptions - There were no change in assumptions since the previous valuation for other postemployment benefits.

Schedule of the District's Proportionate Share of the Net OPEB Liability - MPP Program

Changes in Benefit Terms - There were no changes in the benefit terms since the previous valuation.

Changes of Assumptions - The plan rate of investment return assumption was changed from 2.85 percent to 3.58 percent since the previous valuation.

Schedule of OPEB Contributions

A 10-year schedule presenting for each year the information indicated in subparagraphs (1)–(6), if an actuarially determined contribution is calculated for employers or nonemployer contributing entities. The schedule should identify whether the information relates to the employers, nonemployer contributing entities, or both.

An Actuarially determined contribution was not calculated, therefore the schedule of OPEB Contributions is not applicable and not presented.

ESCALON UNIFIED SCHOOL DISTRICT

NOTE TO REQUIRED SUPPLEMENTARY INFORMATION FOR THE YEAR ENDED JUNE 30, 2018

Schedule of Annual Money-Weighted Rate of Return on OPEB Plan Investment

This 10-year schedule is required by GASB Statement No. 74/75. A 10-year schedule presenting for each fiscal year the annual money-weighted rate of return on OPEB plan investments calculated as required by paragraph 34b(3) should be presented in required supplementary information.

The District did not participate in an irrevocable trust as of June 30, 2018, therefore the Schedule of Annual Money-Weighted Rate of Return on OPEB Plan Investment is not applicable and not presented.

Schedule of the District's Proportionate Share of the Net Pension Liability

This 10-year schedule is required by GASB Statement No. 68 for each cost-sharing pension plan. Until a full 10-year trend is compiled, the schedule will only show those years under which GASB Statement No. 68 was applicable. The schedule presents the District's proportion (percentage) of the collective net pension liability, the District's proportionate share (amount) of the collective net pension liability, the District's covered-employee payroll, and the pension plan's fiduciary net position as a percentage of the total pension liability.

Changes in Benefit Terms - There were no changes in benefit terms since the previous valuations for both CalSTRS and CalPERS.

Changes of Assumptions - The CalSTRS plan rate of investment return assumption was changed from 7.60 percent to 7.10 percent since the previous valuation. The CalPERS plan rate of investment return assumption was changed from 7.65 percent to 7.15 percent since the previous valuation.

Schedule of District's Contributions for Pensions

This 10-year schedule is required by GASB Statement No. 68 for each cost-sharing pension plan. Until a full 10-year trend is compiled, the schedule will only show those years under which GASB Statement No. 68 was applicable. The schedule presents the District's statutorily or contractually required employer contribution, the amount of contributions recognized by the pension plan in relation to the statutorily or contractually required employer contribution, the difference between the statutorily or contractually required employer contribution and the amount of contributions recognized by the pension plan in relation to the statutorily or contractually required employer contribution, the District's covered-employee payroll, and the amount of contributions recognized by the pension plan in relation to the statutorily or contractually required employer contribution as a percentage of the District's covered-employee payroll.

ESCALON UNIFIED SCHOOL DISTRICT

NOTE TO SUPPLEMENTARY INFORMATION JUNE 30, 2018

NOTE 1 – PURPOSES OF SCHEDULES

Schedule of Expenditures of Federal Awards

The accompanying schedule of expenditures of Federal awards includes the Federal grant activity of the District and is presented on the modified accrual basis of accounting. The information in this schedule is presented in accordance with Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of, the financial statements.

The following schedule provides reconciliation between revenues reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances, and the related expenditures reported on the Schedule of Expenditures of Federal Awards. The reconciling amount consists primarily of Medi-Cal Billing Option funds that have been recorded in the current period as revenues that have not been expended as of June 30, 2018. These unspent balances are reported as legally restricted ending balances with the General Fund.

Description	CFDA Number	Amount
Total Federal Revenues From the Statement of Revenues, Expenditures and Changes in Fund Balances:		\$ 1,729,752
Medi-Cal Billing Option	93.778	(9,724)
Total Schedule of Expenditures of Federal Awards		<u>\$ 1,720,028</u>

Indirect Cost Rate – The District has elected not to use the 10 percent de minimis indirect cost rate allowed under the Uniform Guidance.

Sub-recipients – The District did not provide federal awards to sub-recipients during the year ended June 30, 2018.

Local Education Agency Organization Structure

This schedule provides information about the District's boundaries and schools operated, members of the governing board, and members of the administration.

Schedule of Average Daily Attendance (ADA)

Average daily attendance (ADA) is a measurement of the number of pupils attending classes of the District. The purpose of attendance accounting from a fiscal standpoint is to provide the basis on which apportionments of State funds are made to school districts. This schedule provides information regarding the attendance of students at various grade levels and in different programs.

ESCALON UNIFIED SCHOOL DISTRICT

NOTE TO SUPPLEMENTARY INFORMATION JUNE 30, 2018

Schedule of Instructional Time/Schedule of Instructional Time – Regular and Charter School

The District has received incentive funding for increasing instructional time as provided by the Incentives for Longer Instructional Day. These schedules present information on the amount of instructional time offered by the District and whether the District complied with the provisions of Education Code Sections 46200 through 46206.

The District has not met its local control funding formula target.

Districts must maintain their instructional minutes at the 1986-87 requirement as required by *Education Code* Section 46201.

Reconciliation of Annual Financial and Budget Report with Audited Financial Statements

This schedule provides the information necessary to reconcile the fund balance of all funds reported on the Unaudited Actual Financial Report to the audited financial statements.

Schedule of Financial Trends and Analysis

This schedule discloses the District's financial trends by displaying past years' data along with current year budget information. These financial trend disclosures are used to evaluate the District's ability to continue as a going concern for a reasonable period of time.

Schedule of Charter Schools

This schedule provides information for the California Department of Education to monitor financial reporting by Charter Schools.

Non-Major Governmental Funds – Balance Sheet and Statement of Revenues, Expenditures and Change in Fund Balance

The Non-Major Governmental Funds Combining Balance Sheet and Combining Statement of Revenues, Expenditures and Changes in Fund Balance is included to provide information regarding the individual funds that have been included in the Non-Major Governmental Funds column on the Governmental Funds Balance Sheet and Statement of Revenues, Expenditures, and Changes in Fund Balance.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Governing Board
Escalon Unified School District
Escalon, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Escalon Unified School District (the District) as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise Escalon Unified School District's basic financial statements, and have issued our report thereon dated December 5, 2018.

Emphasis of Matter - Change in Accounting Principles

As discussed in Note 1 and Note 14 to the financial statements, in 2018, the District adopted new accounting guidance, GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. Our opinion is not modified with respect to this matter.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Escalon Unified School District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness on Escalon Unified School District's internal control. Accordingly, we do not express an opinion on the effectiveness of Escalon Unified School District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the District's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit, we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Escalon Unified School District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

Governing Board
Escalon Unified School District
Escalon, California

Report on Compliance for Each Major Federal Program

We have audited Escalon Unified School District's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of Escalon Unified School District's (the District) major Federal programs for the year ended June 30, 2018. Escalon Unified School District's major Federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations and terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Escalon Unified School District's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States and the audit requirements of Title 2 U.S. *Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Escalon Unified School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major Federal program. However, our audit does not provide a legal determination of Escalon Unified School District's compliance.

Opinion on Each Major Federal Program

In our opinion, Escalon Unified School District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major Federal programs for the year ended June 30, 2018.

Report on Internal Control Over Compliance

Management of the Escalon Unified School District is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Escalon Unified School District's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Escalon Unified School District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT STATE COMPLIANCE

Governing Board
Escalon Unified School District
Escalon, California

Report on State Compliance

We have audited Escalon Unified School District's compliance with the types of compliance requirements as described in the *2017-18 Guide for Annual Audits of K-12 Local Education Agencies and State Compliance Reporting* that could have a direct and material effect on each of the Escalon Unified School District's government programs as identified in the below schedule for the year ended June 30, 2018.

Management's Responsibility

Management is responsible for compliance with the requirements of state laws, regulations and the terms and conditions of its state awards applicable to its state programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for the Escalon Unified School District's State programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *2017-18 Guide for Annual Audits of K-12 Local Education Agencies and State Compliance Reporting*, published by the Education Audit Appeals Panel, prescribed in Title 5, *California Code of Regulations*, section 19810. These require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the programs identified in the below schedule occurred. An audit includes examining, on a test basis, evidence about Escalon Unified School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion on compliance. However, our audit does not provide a legal determination on the District's compliance with those requirements.

In connection with the requirements referred to above, we selected and tested transactions and records to determine the Escalon Unified School District's compliance with State laws and regulations applicable to the following items:

Compliance Requirements	Procedures Performed
LOCAL EDUCATION AGENCIES OTHER THAN CHARTER SCHOOLS	
Attendance	Yes
Teacher Certification and Misassignments	Yes

The District's reported ADA for Continuation Education was below the materiality level that requires testing; therefore, we did not perform any testing of Continuation Education ADA.

The District's reported ADA for Independent Study was below the materiality level that requires testing; therefore, we did not perform any testing of Independent Study ADA.

Opinion on State Compliance

In our opinion, Escalon Unified School District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on the programs identified in the above schedule for the year ended June 30, 2018.
